About us.

Stellar Renewables Pvt. Ltd. in association with Mehar Group have brought North India's most technologically advanced manufacturing facility for Vacuum Tube type Solar Water Heaters with a monthly Production capacity of upto 1500 systems.

Our Products have been tested and verified by Regional Testing Institute of MNRE.

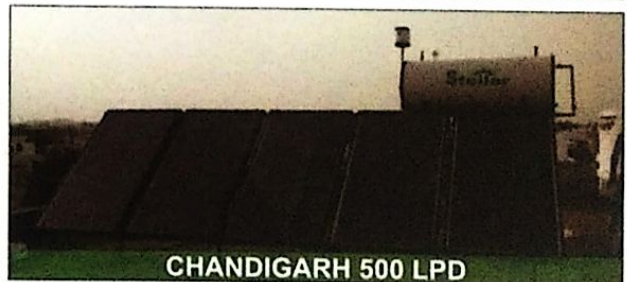

We are confident on our product because of the carefully chosen raw materials, conforming to International standards and Computerized controlled and programmable set of machines used to manufacture our systems.

With strong focus on the fact that the most abundant energy sources on our mother Earth are Solar Energy and Wind Energy. We are aiming to make these sources of energy available to each and every one at the most affordable prices.
